PLASTIC OCEANS

THERE ARE TWO TYPES OF POLLUTION THAT ARE DANGEROUS FOR OUR OCEANS: CHEMICALS AND RUBBISH.

MOST OF THE CHEMICALS COME FROM AGRICULTURE AND MOST OF THE RUBBISH COMES FROM INDUSTRIAL PRODUCTS LIKE PLASTIC.

PLASTIC IS DANGEROUS FOR SEA CREATURES. THEY OFTEN DIE INSIDE PLASTIC BAGS. SEA BIRDS THINK PLASTIC IS FOOD AND GIVE IT TO THEIR BABIES. FISH EAT PLASTIC TOO AND WE EAT FISH.

TURTLES THINK PLASTIC IN THE WATER IS JELLY -FISH, THEIR FAVOURITE FOOD.

BUT ANIMALS CAN'T LIVE WITH PLASTIC IN THEI STOMACHS!

IN THE NORTH PACIFIC, A LOT OF PLASTIC ENTERS THE "GREAT PACIFIC VORTEX" AND GOES ROUND AND ROUND IN AN ENORMOUS CIRCLE: AN ISLAND OF PLASTIC AND RUBBISH THREE TIMES BIGGER THAN FRANCE!

STATEMENTS

- 1) OUR OCEANS ARE POLLUTED ONLY BY THE CHEMICALS COMING FROM AGRICULTURE
- 2) PLASTIC BAGS ARE DANGEROUS FOR SEA CREATURES
- 3) CHEMICALS DON'T POLLUTE OUR OCEANS
- 4) SEA CREATURES GIVE PLASTIC TO THEIR BABIES BECAUSE THEY THINK IT'S FISH
- 5) JELLY- FISH ISN'T TURTLES' FAVOURITE FOOD
- 6) THE "GREAT PACIFIC VORTEX" IS IN THE NORTH PACIFIC
- 7) THE "GREAT PACIFIC VORTEX" IS THREE TIMES BIGGER THAN SPAIN
